

PATCH PANEL MODEL AIC-2

CISCO® P/N: 74-2770-01 PATCH PANEL

Description:

AIC-2 Patch Panel (Cisco® P/N: 74-2770-01) terminates up to 2 Cisco® NM-AIC-64s (Alarm Interface Controllers). Each side of the panel allows up to 56 discrete alarm terminations (112 total) and 8 analog alarms (16 total). A terminal strip is provided so alarms are powered by a single 500 mA DC supply as opposed to individual power sources.

Dimensions:

Height:1.63"
Width:19.00"
Depth:11.73"
(w/ cable bracket)
1RU (rack unit)

Benefits:

- Eliminates the need for individual power to alarms
- Fused power circuits
- PCB construction
- Quick install
- Occupies only 1 RU (rack unit)

Specifications:

- Cisco® P/N: 74-2770-01
- Patented: #6,302,742 B1
- UL
- NEBS
- EIA-310-D Compliant

Accessories:

- SCSI II Cables
P/N: PF 20218-4 (Set of 4 at 8')
P/N: PF 20218 (One cable at 8')
Custom lengths available
- Telco cables
Custom lengths available
- 23" Mounting bracket (optional)
P/N: PF 20209
